THE READING

From <https://breakingnewsenglish.com/2304/230410-chatgpt-4-medical-diagnoses-5.html>

Many of us rely on "Doctor Google" to self-diagnose our aches and pains. The coming of AI has brought a much more powerful tool to help with this - ChatGPT-4. This is the next generation of the chatbot ChatGPT, which is only four months old. Doctors believe ChatGPT-4 will revolutionize their work and improve the lives of patients. Three artificial intelligence experts have written a book titled: "The AI Revolution in Medicine". They say ChatGPT-4 will provide surgeons with critical, life-saving advice and information. They say we need to start understanding AI's potential.

The new book says ChatGPT-4 will be invaluable to doctors. It suggests the chatbot will be like having "a benevolent mentor-servant with access to nearly all the world's medical knowledge" at your fingertips. The authors said that: "From diagnosis to medical records to clinical trials, its impact will be broad." However, they also acknowledged that AI cannot address all medical complications. The authors said ChatGPT-4 can make "inaccuracies in otherwise sound medical advice". They added that it still gives "wrong answers that almost always look right".

CHATBOTS SURVEY

From <https://breakingnewsenglish.com/2304/230410-chatgpt-4-medical-diagnoses-4.html>

Write five GOOD questions about chatbots in the table. Do this in pairs. Each student must write the questions on his / her own paper.

When you have finished, interview other students. Write down their answers.

	STUDENT 1 _____	STUDENT 2 _____	STUDENT 3 _____
Q.1.			
Q.2.			
Q.3.			
Q.4.			
Q.5.			

- Now return to your original partner and share and talk about what you found out. Change partners often.
- Make mini-presentations to other groups on your findings.

WRITE QUESTIONS & ASK YOUR PARTNER(S)

Student A: Do not show these to your speaking partner(s).

a) _____

b) _____

c) _____

d) _____

e) _____

f) _____
