THE READING

From <https://breakingnewsenglish.com/2304/230410-chatgpt-4-medical-diagnoses-4.html>

Many of us use "Doctor Google" to diagnose our aches and pains. AI has brought a much more powerful tool to help us - ChatGPT-4. This is the next generation of the chatbot ChatGPT. Doctors say ChatGPT-4 will revolutionize their work and improve patients' lives. Three AI experts have written a book called: "The AI Revolution in Medicine". They say ChatGPT-4 will provide surgeons with critical, life-saving advice and information.

The experts say ChatGPT-4 will be invaluable to doctors. It will be like having a kind and helpful teacher by your side who has nearly all the world's medical knowledge. The experts said that: "From diagnosis to medical records to clinical trials, its impact will be broad." However, they also said AI cannot answer all medical difficulties and that ChatGPT-4 can make "inaccuracies in otherwise sound medical advice".
